DESCRIPTION

The overarching goal of the Environmental Studies (ESR) program at Portland Community College (PCC) is to prepare environmentally literate students who make informed, evidence-based decisions about the environmental issues affecting their communities. The fields of environmental studies and science are interdisciplinary, integrating the sciences with the study of human society, law and policy in order to address our most pressing environmental issues. The Environmental Studies program prepares students to pursue degrees in both environmental science and environmental studies. Environmental science is a field that integrates biological and physical science and uses scientific practices to investigate environmental systems, problems and solutions. Environmental studies is a field that investigates coupled human-natural systems, requiring an understanding of environmental processes as well as social systems including law, policy, sociology, economics, planning and natural resource management.

The ESR program offers a variety of courses including sustainability courses (ESR 140 and ESR 141), general education lab science courses for non-majors (ESR 171, ESR 172, and ESR 173), and a sequence of courses for students planning to major in either environmental science or environmental studies (ESR 150, ESR 200 (formerly 160), ESR 201 and ESR 202). PCC students have the option of pursuing the Associate of Arts Oregon Transfer (AAOT) or the Associate of Science Transfer (AS) degree to complete courses in preparation for a bachelor's degree in environmental studies or environmental science (if transferred to a four-year program at a college or university). For students planning to major in environmental science, the AS will provide more flexibility than the AAOT, and allows students to complete both their Associate degree and the required lower-division courses for the major.

Students must check the specific requirements of the major and bachelor's program to which they intend to transfer; please review the transfer guides for environmental studies and environmental science: http://www.pcc.edu/programs/university-transfer/transfer-schools/

For students intending to transfer to Portland State University to major in Environmental Studies or Environmental Science, the following course sequence is recommended: ESR 150 and ESR 200 (first fall or winter term), ESR 201 (first or second winter term) and ESR 202 (second fall term). Currently, these majors courses are offered only at the Rock Creek Campus. For information regarding the Environmental Studies major transfer program, please contact the Environmental Studies office at Rock Creek at 971-722-7257.
ESR 204. Introduction to Environmental Restoration. 4 Credits.
Develops an understanding of the ecological theory and practice of environmental restoration using local and global case studies. Provides opportunities to engage in hands-on experience with restoration projects in a variety of ecosystems, and at different stages of the restoration process. Includes fieldwork. Prerequisites: ESR 171 or ESR 200 or BI 143 and (WR 115 and RD 115) or IRW 115 and MTH 20 or equivalent placement. Audit available. This course fulfills the following GE requirements: Science, Math, Computer Science/AAS, Science, Math, Computer Science/AGS, Science, Math, Computer Science/AS, Science, Math, Computer Science/AAOT, Science, Math, Computer Science/ASOT-B.

ESR 298. Independent Study: Environmental Science. 1-4 Credit.
Provides an opportunity to perform research on a selected topic related to environmental science or environmental studies under the supervision of an instructor. Prerequisite: Instructor approval, and (WR 115 and RD 115) or IRW 115 and MTH 20 or equivalent placement. Audit available.
