## CAREER AND PROGRAM DESCRIPTION

Interior designers specialize in creating uniquely defined environments that cater to the special needs and functional requirements of its user. Students in this program learn to apply design principles and techniques to the professional planning and furnishing of residential interiors.

PCC's Interior Design program is the only two-year degree program in residential interior design available in Oregon and Southern Washington. Our graduates are sought by employers for their unique abilities: adept design problem solving, ability to draw from historical traditions, and effective communication skills. The curriculum includes a range of courses from Interior Design, Architecture, Art, and Business. Students gain hands-on experience through an internship program. Articulation agreements are in place with select local colleges for those wanting to pursue related bachelor degrees.

The degree program prepares students for an entry-level position as an interior designer, or for more advanced placement in the wholesale and retail sales business. Emphasis is placed on a broad scope of courses which are application-oriented. Students must finish the Interior Furnishings Certificate before or concurrently with this option. Specializations within the program of study also include Design for Accessibility and Aging in Place and Kitchen and Bath Design.
